

## About Us

London Gynaecology is a leading, Private Equity backed private women's health practice, currently based at three locations: our Centre of Excellence on Harley Street, our clinic based out of The Portland Hospital, one of London's leading private hospitals, and our independent clinic in the City of London. With over 20 consultants & GPs, the practice is busy and dynamic and sees in excess of 1500 patients monthly. Over the coming few years, we are planning to rapidly expand the number of clinics and clinical services we provide, beginning with a new clinic in Richmond in October 2025.

Our Ethos & Mission is to provide excellent, expert advice and high quality personalised healthcare at every stage of the patient pathway, ensuring the best possible outcomes for our patients relating to their gynaecological and reproductive health. Part of our mission is to also provide a safe framework for doctors to deliver expert care, using state of the art medical equipment and facilities, a robust clinical governance framework and a multi-disciplinary team and working practice, supported by first class technology and administrative support.

Our Values are to work together as "ONE TEAM":

- **O**wnership
- **N**urturing
- **E**xcellence
- **T**rust
- **E**mpathy
- **A**ccessibility
- **M**entorship

We believe it is important to treat every patient and colleague with honesty, dignity and respect. Cultural fit is non-negotiable. We are a team, the wellbeing of our staff is paramount and we treat each other with respect and kindness. We are looking for team members who embody these values, are team-players and will go above and beyond to deliver excellent patient service and contribute to making LG a wonderful place to work.

### The Role

We are currently seeking Consultant Gynaecologists to join our team, who are able to perform and possibly expand upon the services that we currently offer:

- General gynaecology
- Contraception including coils and implants
- Cervical screening and colposcopy
- Ultrasound scans
- Hormonal health and menopause
- Early pregnancy care and screening
- Antenatal care and scans
- Specific services relating to fibroids, endometriosis, adenomyosis and polyps
- Surgical procedures, such as hysteroscopy, laparoscopic myomectomy, operative laparoscopy, abdominal myomectomy, laparoscopic hysterectomy, abdominal hysterectomy, and laser cone biopsy
- Areas we are looking to enhance are: Urogynaecology, Menopause, Fertility, Ultrasound Scanning and Colposcopy
- Weekend and Evening sessions available

### Requirements

- To be able to demonstrate clinical excellence, and professionalism across the role
- Great time management and flexibility
- To have a professional and caring manner towards patients
- Ability to communicate effectively with colleagues, patients, relatives, GPs, nurses and other agencies, teams and professionals.
- Registered or willing to register with private healthcare companies, e.g. AXA, BUPA, Vitality, WPA and Cigna
- To be able to commit to minimum requirement of two clinical sessions each week
- On Specialist Register with GMC with evidence of annual appraisal and revalidation

- Team-player; to be able to work collaboratively, respectfully and in live with London Gynaecology's values.

### **Experience & Qualifications**

- Experience of working at consultant level in the NHS is essential
- Private Practice experience is desirable
- Evidence of professional updates & mandatory training
- Full GMC Registration
- MBBS / MRCP / equivalent medical qualification
- MRCOG or appropriate specialist registration
- Enhanced DBS and reference checks will be undertaken on all successful applicants.
- We are particularly looking for expertise in Urogynaecology, Ultrasound Scanning and Colposcopy

### **Applications**

Please send your CV and covering email to [applications@london-gynaecology.com](mailto:applications@london-gynaecology.com) with subject line "FAO: HR – Consultant Application".

### **Disclaimer**

The job duties and responsibilities outlined are not exhaustive and may be subject to change.
